

IGIS WATER LEVEL INDICATOR MODEL WLI-C

IGIS has introduced new Water Level indicator with counter mechanism is a very handy device to quickly check the level of water in open wells and in borewells.

A sensor attached to the end of a cable, wound on a winch is lowered into the well. over a calibrated wheel attached to the counter mechanism. The moment the sensor touches the water surface, a panel meter on the winch which is on the ground shows full deflection with buzzer sound. The depth to the water level from the ground can be read off in metric scale on the counter.

SPECIFICATIONS

Length of the cable	: 100m / 200m / 300m
Indication	: LED & Buzzer sound
Power Supply	: 9 Volts battery
Weight	: 8.0 Kgs. approximately.
